Smart Assistant

Numero di riferimento

SMART-ASSIST

Smart Assistant

Note: The software can only be downloaded from the JUNG website www.jung.de/ software. For an unrestricted use the software must be activated via a MyJUNG account.

Smart Assistant is a planning tool for the simple creation of visualisation projects for the JUNG Visu Pro software or other automation applications such as iHaus. The use of conventions and schemes (trade, floor, room, function) does not require knowledge of KNX group addresses.

Export formats are available for JUNG Visu Pro software, iHaus and ETS group addresses.

Requirements

Server/client-based software, but can be used with one PC

Operating systems for server: Windows 7 Home, Professional and Ultimate (32- and 64-bit) or higher, not Windows 2008 or 2012 Server

Clients: Browser suitable for HTML5 (e.g. latest version of Chrome, Firefox or Safari)
